INDEX.

A.

Abel, F. A., contributions to the history of explosive agents, 41.
Absorption of mixed vapours by charcoal, note on: by John Hunter, 73.
Acetic acid, obtained from human urine during the decomposition of urochrome, 401.
Acetylinated ethyl, on salts of: by J. A. Wanklyn, 14.
Acid carbonate of ammonia, commercial, 240.
Agents, explosive, contributions to the history of: by F. A. Abel, 41.
Air, note on the organic matter contained in: by E. T. Chapman, 98.
Albumin, forms of ferment to which it gives rise, 387.
Alcohol-radicals, on the production of the sulphates of, from the nitrites by the action of sulphurous acid: by E. T. Chapman, 415.
Alcohol-radicals, isomerism among the sulphates of, 418.
Alcohols, note on some reactions of: by E. T. Chapman, 96.
Alizarin, on artificial: by W. H. Perkin, 133.
—— comparison of natural and artificial, 141.
—— formation of, from anthracene, 136.
—— spectrum of, 142.
Ammonia carbonate formerly found in commerce, not a single substance, 278.
—— carbonates examined by Rose, 279.
—— commercial acid carbonate of, 240.
—— carbonic anhydride and water, the single or chemical substances produced by condensing mixtures of, 273.
—— and water, on the combinations of carbonic anhydride with: by E. Divers, 171.
Ammonio-magnesian carbonate, products of the distillation of, 272.
Ammonium acid carbonate, distillation of, 263.
—— —— —— produced by condensing mixtures of carbonic anhydride, ammonia, and water, 274.
Ammonium carbamate, 214.
—— —— distinction from carbonates, 228.
—— —— and carbonate, precipitation of by calcium chloride, 359.
—— —— produced by condensing mixtures of carbonic anhydride, ammonia, and water, 273.
—— carbonate, acid, 198.
Ammonia carbonate of commerce, 231.
Ammonium carbonates, constitution of, 209.
—— carbonate, half-acid, 189.
—— —— normal, 172.
Ammonia, commercial carbonate, products of the slow distillation of, 266.
Ammonium, half-acid carbonate, distillation of, 265.
—— normal carbonate, distillation of, 261.
—— on the existence of a normal orthocarbonate of, 213.
Amyl alcohol, separation of rotating and non-rotating, 96.
Amyl nitrite, action of sulphurous acid on, 416.
—— —— preparation of, 419.
Andrews, F., on the continuity of the gaseous and liquid states of matter, 74.
—— on the heat developed in the combination of acids and bases, 431.
Anniversary meeting of the Chemical Society, March 30, 1870, 290.
Anthracene, formation of, from alizarin, 135.
—— refraction-equivalent of, 151.
Anthraquinone, 136.
Anthraquinonic acid (alizarin), 136.
Aromatic hydrocarbons and their derivatives, on the refraction-equivalents of: by J. H. Gladstone, 147.
Assays of gold and silver bullion, on the manipulation of: by C. Tookey, 366.
Atlantic ocean, composition of water of, 145.

B.

Balance-sheet of the Chemical Society, (1869–70), 315.
Barium hyposulphite, 426.
Bell, James, on fungi and fermentation, 387.
Bolas, T., and Groves, C. E., note on bromopicrin, 153.
—— —— —— on tetrabromide of carbon, 154, 161.
Brayley, E. W., obituary notice of, 291.
Bromhydranil, 11.
Bromanil, action of sulphurous acid on, 11.
Bromanil and Chloranil, on: by J. Stenhouse, 6.
Bromanilic acid, 12.
Bromine, action of, on bromanilic acid, 13.
Bromanilphenylamide, 12.
Bromine, its action on vanadium tetrachloride, 349.
—— derivatives of coumarin, on some new: by W. H. Perkin, 368.
Bromocoumarin, 371.
Bromoform, formation of carbon tetrabromide from, 163.
Bromopicrin, formation of carbon tetrabromide from, 163.
—— note on: by T. Bolas and C. E. Groves, 153.
Brown, J. T., on vapour-densities, 323.
Butyl nitrite, action of sulphurous acid on, 417.

C.

Calcium chloride, on the precipitation of solutions of ammonium carbonate, sodium carbonate, and ammonium carbonate by: by E. Divers, 359.
Carbon, on the methods for the determination of, in steel: by W. D. Herman, 375.
—— effect of excess of, in the composition of a substance, on its propagation of light, 151.
—— tetrabromide, on: by T. Bolas and C. E. Groves, 154, 161.
—— —— action of reducing agents on, 165.
—— —— from bromoform, 163.
—— —— „ bromopicrin, 162.
—— —— „ carbonic disulphide, 161.
Carbamate of ammonium, a product of the condensation of mixtures of carbonic anhydride, ammonia, and water, 273.
—— —— distinction from carbonates, 228.
Carbamate of ammonium, precipitation of, by calcium chloride, 359.
"Carbonate of ammonia," of commerce, 231.
—— —— commercial acid, 240.
—— —— formerly found in commerce, not a single substance, 271, 278.
—— —— products of the slow distillation of the commercial, 266.
Carbonate, ammonio-magnesian, products of the distillation of, 272.
Carbonates of ammonia, examined by Rose, 278.
Carbonate of ammonium, acid, 198.
—— —— acid, produced by condensing mixtures of carbonic anhydride, ammonium, and water, 274.
—— —— half acid, 189.
—— —— normal, 172.
—— —— precipitation by calcium chloride, 359.
Carbonates of ammonium, constitution of, 209.
—— —— distillation of the normal, acid and half-acid, 261.
Carbon-compounds, refraction-equivalents of, 107.
Carbonate of potassium, products of the distillation of sal-ammoniac with, 259.
Carbonate of sodium, precipitation of by calcium chloride, 359.
—— —— products of the distillation of sal-ammoniac with, 260.
Carbonic acid, change of volume and liquefaction of, produced by pressure, 81.
—— —— effect of, on a solution of lead chloride, 38.
—— —— solution of in water, 37.
Carbonic anhydride, on the combinations of, with ammonia and water: by E. Divers, 171.
—— —— ammonia and water, the single or chemical substances produced by condensing mixtures of, 273.
Carbonic disulphide, formation of carbon tetrabromide from, 161.
Chalcophyllite, on: by A. H. Church, 168.
Chalk, products of the distillation of sal-ammoniac with, 252.
Chapman, E. T., note on some reactions of alcohols, 96.
—— —— note on the organic matter contained in air, 98.
—— —— on the production of the sulphates of the alcohol-radicals from the nitrites by the action of sulphurous acid, 415.
Charcoal, note on the absorption of mixed vapours by: by John Hunter, 73.

Chemical Society, balance-sheet of (1869–70), 318.
—— —— donations to the library of (1869–70), 318.
—— —— proceedings at the meetings of (1869–70), 286.
Chloranil and Bromanil, on: by J. Stenhouse, 6.
Chloranilic acid, 6.
Chloride of nitrogen, explosion of, 45.
Chlorides of vanadium, 344.
Chlorocarbonate of lead, 38.
Chloroxynaphthalic acid, constitution of, 133, 135.
Chloronaphthaquinones and chlorotoluquinones, 135.
Chromium oxychloride, on a new: by T. E. Thorpe, 31.
Church, A. H., on namaqualite, 1.
—— on new and rare Cornish minerals, 3, 165.
Cobalt-hyposulphite, 430.
Coumarin, on some new bromine-derivatives of: by W. H. Perkin, 368.

D.

Detonation, mechanical effect of, in causing the explosion of gun-cotton, nitroglycerin, &c., 51–72.
Dibromide of coumarin, 369.
Dibromanthraquinone, 136.
Dioxanthraquinonic acid (alizarin), 139.
Disulphanthraquinonic acid, 138.
Divers, E, on the combinations of carbonic anhydride with ammonia and water, 171.
—— —— on the precipitation of solutions of ammonium carbonate, sodium carbonate, and ammonium carbamate by calcium chloride, 359.

E.

Elements, refraction-equivalents of, 109.
Erdmann, O. L., obituary notice of, 306.
Ether chloranilic, 14.
Ethyl, on salts of acetylinated: by J. A. Wanklyn, 14.
Ethyl nitrite, action of sulphurous acid on, 417.
Explosive agents, contributions to the history of: by F. A. Abel, 41.

F.

Feed-water, on an acid, from the coal-fields of Stellarton, Nova Scotia, and the results of its use: by Prof. How, 155.
Formic acid, obtained from human urine during the decomposition of urochrome, 400.
Fulminate mercuric, explosion of, 44.
Fungi and fermentation, on: by James Bell, 317.

G.

Gases in water, observations on the solution of, 36.
Gaseous and liquid states of matter, on the continuity of: by T. Andrews, 74.
Gas-furnace, new: by Charles Griffin, 280.
Gladstone, J. H., on refraction-equivalents, 101.
—— on the refraction-equivalents of the aromatic hydrocarbons and their derivatives, 147.
Glass, action of vanadium on, 358.
Glonoïn. See Nitroglycerin.
Gluten: forms of ferment to which it gives rise, 387.
Gold-bullion, manipulation of assays of, 366.
Graham, Thomas, obituary notice of 293.
Grape and malt yeast-plants, comparative fermentative properties of, 393.
Griffin, Charles, account of a new gas-furnace for chemical operations at a white heat without the use of a blowing machine, 280.
Groves, C. E., and T. Bolas, note on bromopicrin, 153.
—— —— on tetrabromide of carbon, 154, 161.
Gun-cotton, conditions which determine the inflammability and explosive force of, 41.
Gunpowder, conditions which determine the rapidity of explosion of, 43.

H.

Heat, on the, developed in the combination of acids and bases: by T. Andrews.
Heisch, Charles, on organic matter in water, 371.
Hermann, W. D., on the methods for the determination of carbon in steel, 375.
Hisingerite, on: by A. H. Church, 3.
How, Prof., on an acid feed-water from

the coal field at Stellarton, Nova Scotia, and the results of its use, 155.
Hunter, John, analysis of deep sea water, 144.
—— note on the absorption of mixed vapours by charcoal, 73.
—— results of the analysis of sea-water, performed on board H.M.S. "Porcupine," 16.
Hydrocarbons, on the refraction-equivalents of the aromatic, and their derivatives: by J. H. Gladstone, 147.
Hyposulphites, on the composition of, by E. A. Letts, 423.

I.

Iodide of nitrogen, explosion of, 45.
Isomerism among sulphates of alcohol-radicals, 418.

K.

Kryptophanates, metallic, 122.
Kryptophanic acid, absorption of oxygen by, in alkaline solution, 121.
—— —— the normal free acid of human urine: by J. L. W. Thudichum, 116.
—— —— theoretical considerations on, 132.

L.

Lead, chlorocarbonate of, 38.
Lead hyposulphite, 427.
Letts, E. A., on the composition of the hyposulphites, 423.
Leucimide, on: by J. L. W. Thudichum, 409.
Library of the Chemical Society, donations to (1869–70), 318.
Liquid and gaseous states of matter, on the continuity of: by T. Andrews, 74.

M.

Madan, H. G., remarks on some points in the nomenclature of salts, 22.
Magnesium hyposulphite, 428.
Malt and grape yeast-plants, comparative fermentative properties of, 393.
Matter, on the continuity of the gaseous and liquid states of: by T. Andrews, 74.
Meetings of the Chemical Society, proceedings at (1869–70), 286.
Mercuric fulminate, explosion of, 44.
Metals, refraction-equivalents of, 113.
Minerals, on new and rare Cornish: by A. H. Church, 3.
Moulds, action of, on sugar-solutions, 391.

N.

Namaqualite, on: by A. H. Church, 1,
Naphthalin, refraction-equivalent of 151.
Naphthoquinones, 135.
Nickel hyposulphite, 429.
Nitrites of the alcohol-radicals, on the production of the sulphates from, by means of sulphurous acid: by E. T. Chapman, 415.
Nitrogen, chloride and iodide, explosion of, 45.
Nitroglycerin, conditions of explosion of, 46.
Nomenclature of salts, on some points in: by H. G. Madan, 22.
Nontronite, on: by T. E. Thorpe, 29.
Northcote, A. B., obituary notice of, 299.

O.

Obituary notice of E. W. Brayley, 291.
—— —— O. L. Erdmann, 306.
—— —— T. Graham, 293.
—— —— A. B. Northcote, 299.
—— —— F. Penny, 301.
—— —— J. Redtenbacher, 311.
Olefines, refraction-equivalents of, 151.
Organic matter contained in the air, note on the: by E. T. Chapman, 98.
Organic matter in water, on: by Charles Heisch, 371.
Orthocarbonate of ammonium, as to the existence of a normal, 213.
Oxychloride, on a new chromium: by T. E. Thorpe, 31.
Oxygen, refraction-equivalents of, 112.

P.

Paraffins, refraction-equivalents of, 151.
Pearl-ash and sal-ammoniac, products of the distillation of, with aqueous alcohol, 270.
Penny, Frederick, obituary notice of, 301.
Perkin, W. H., on artificial alizarin, 133.

Perkin, W. H., on some new bromine derivatives of coumarin, 368.
Permanganate of potassium: its action on vanadium tetrachloride, 348.
Phosphoric acid, on the determination of: by W. C. Williams, 383.
Porcelain, action of vanadium on, 358.
Potassium carbonate, products of the distillation of sal-ammoniac with, 259.
President's Report (March 30, 1870), 290.
Proceedings at the meetings of the Chemical Society (1869–70), 286.
Purpurin, spectrum of, 143.
Pus, action of, on sugar-solutions, 391.

Q.

Quinone, constitution of, 134.

R.

Redtenbacher, Joseph, obituary notice of, 311.
Refraction-equivalents, on: by J. H. Gladstone, 101.
—— —— of the aromatic hydrocarbons, and their derivatives: by J. H. Gladstone, 147.
Restormelite, on: by A. H. Church, 165.
Roscoe, H. E., Researches on vanadium, Part II., 344.
Rose's ammonia carbonates, 278.

S.

Sal-ammoniac and pearl-ash, products of the distillation of, with aqueous alcohol, 260.
Sal-ammoniac, products of the distillation of, with chalk, 252.
Sal-ammoniac, products of the distillation of, with potassium and sodium carbonate, 260.
Salts, on some points in the nomenclature of: by H. G. Madan, 22.
Sea-water, analysis of deep: by John Hunter, 144.
—— —— quantity of gases dissolved in, 36.
—— —— results of analysis of, performed on board H.M.S. "Porcupine:" by John Hunter, 17.
Silver bullion, manipulation of assays of, 366.
Silver fulminate, explosion of, 45.
Sodium carbonate, precipitation of, by calcium chloride, 359.
Sodium carbonate, products of the distillation of sal-ammoniac with, 260.
Sodium chloride, effect of on the solution of carbonic acid in water, 38.
Sodium hyposulphite, 426.
Spiritus ammoniæ aromaticus, 261.
Steel, on the methods for the determination of carbon in: by W. D. Herman, 375.
Stenhouse, John, on chloranil and bromanil, 6.
Strontium hyposulphite, 427.
Sulphanthraquinonic acid, 139.
Sulphates of alcohol-radicals, on the production of, from the nitrites by means of sulphurous acid: by E. T. Chapman, 415.
—— isomerism, among the, 417.
Sulpho-acids, constitution of, 137.
Sulphobenzolic acid, action of potash on, 137.
Sulphoxanthraquinonic acid, spectrum of, 142.
Sugar-solutions, action of moulds and pus on, 391.
Sulphurous acid, action of, on bromanil, 11.

T.

Terbromhydroquinone, 11.
Terbromoquinone, 12.
Terpenes, refraction-equivalents of, 151.
Tetrabromide of carbon, on: by T. Bolas and C. E. Groves, 154, 161.
—— —— action of reducing agents on, 165.
—— —— from bromoform, 163.
—— —— „ bromopicrin, 162.
—— —— „ carbonic disulphide, 161.
Thorpe, T. E., on a new chromium oxychloride, 31.
—— on nontronite, 29.
Thudichum, J. L. W., on acetic and formic acid obtained from human urine, during the chemical decomposition of urochrome, 400.
—— —— on kryptophanic acid, the normal free acid of human urine, 116.
—— —— on leucimide, a decomposition-product of the albuminous substances, and of leucine, 409.
Tin, use of for the estimation of phosphoric acid, 383.
Toluquinones, 135.
Tookey, Charles, on the manipulation of assays of gold and silver bullion, 366.

U.

Urine, on acetic and formic acid obtained from human, during the chemical decomposition of urochrome: by J. L. W. Thudichum, 400.

—— on kryptophanic acid, a normal ingredient of human: by J. L. W. Thudichum, 116.

V.

Vanadium, researches on (Part II): by H. E. Roscoe, 344.

—— action of, on glass and porcelain, 358.

—— dichloride, 350.

—— metallic, 352.

—— mononitride, 344.

—— tetrachloride, 349.

—— trichloride, 345.

Vapour-densities, on: by J. T. Brown, 323.

Vapours, note on the absorption of mixed, by charcoal: by John Hunter, 73.

W.

Wanklyn, J. A., on salts of acetylinated ethyl, a new class of derivatives of the ethyl series, 14.

Water, analyses of sea: by John Hunter, 16, 144.

Water, on an acid feed-water from the coal field of Stellarton, Nova Scotia, and the results of its use: by Prof. How, 155.

—— on organic matter in: by Charles Heisch, 371.

—— on the solution of gases in, 36.

—— and ammonia, on the combinations of carbonic anhydride with: by E. Divers, 171.

Williams, W. C., on the determination of phosphoric acid, 383.

Y.

Yeast, effect of change of soil on the development of, 399.

—— plants from malt and grape, comparative fermentative properties of, 393.

HARRISON AND SONS, PRINTERS IN ORDINARY TO HER MAJESTY, ST. MARTIN'S LANE.
